

HYBRIS: VALIDATION

WEEK 8

Task 8.4 - (Validation):

Task: Add "age" attribute to the "Customer" type.

Create validation to check user age. Make it impossible to create aCustomer with age < 18.

Implementation details

Here are the steps that I took to set up the desired validation:

- Added the age attribute to Customer item type.
- Created an attribute validation item type called NotUnderAgeConstraint
- Implemented a constraint validator called NotUnderAgeValidator
- Inserted a constraint to the database with impex
- Added the age attribute to hmc.xml
